SPECIAL PROJECT INFORMATION SHEET

Project Description	Sliding reaction for 2 x PTM-72-2000 tools		
Date created	28 November 2014	Project Number	Q2908

INTRODUCTION & APPLICATION

Power generation industry requirement to simultaneously tighten two nuts at up to 2,000 N.m torque on a 3 phase transformer, where nut centres range from 320 to 1500mm.

SOLUTION

2 x Pneutorque PTM-72-2000 tools fitted to a special sliding reaction.

TECHNICAL SPECIFICATION / DATA HIGHLIGHTS

One tool is fixed to the hollow section beam and the other tool can slide between 320 & 1500mm from the fixed tool. The tools are mounted via the standard Pneutorque reaction serrations and clip. Lifting handles are provided.
